At Bk - Sandy
the water surprised
me!!!

At Bk - See I want
to say this
man made land.

(9)

Site is made up of similar lands (land forms) with a border component.

The border component comes down & is curvy & rounded. It is hard soft smooth flowing & big.

The border is blue and deep.

~~The~~ the border component ~~is~~ is very fast & salty & watery & it is cold.

The Lands ^(land forms) coming down straight angle and 90 acres. ~~they~~ The lands are hard & smooth.

The lands are brown green & yellow. The lands are soft & mushy & wet.

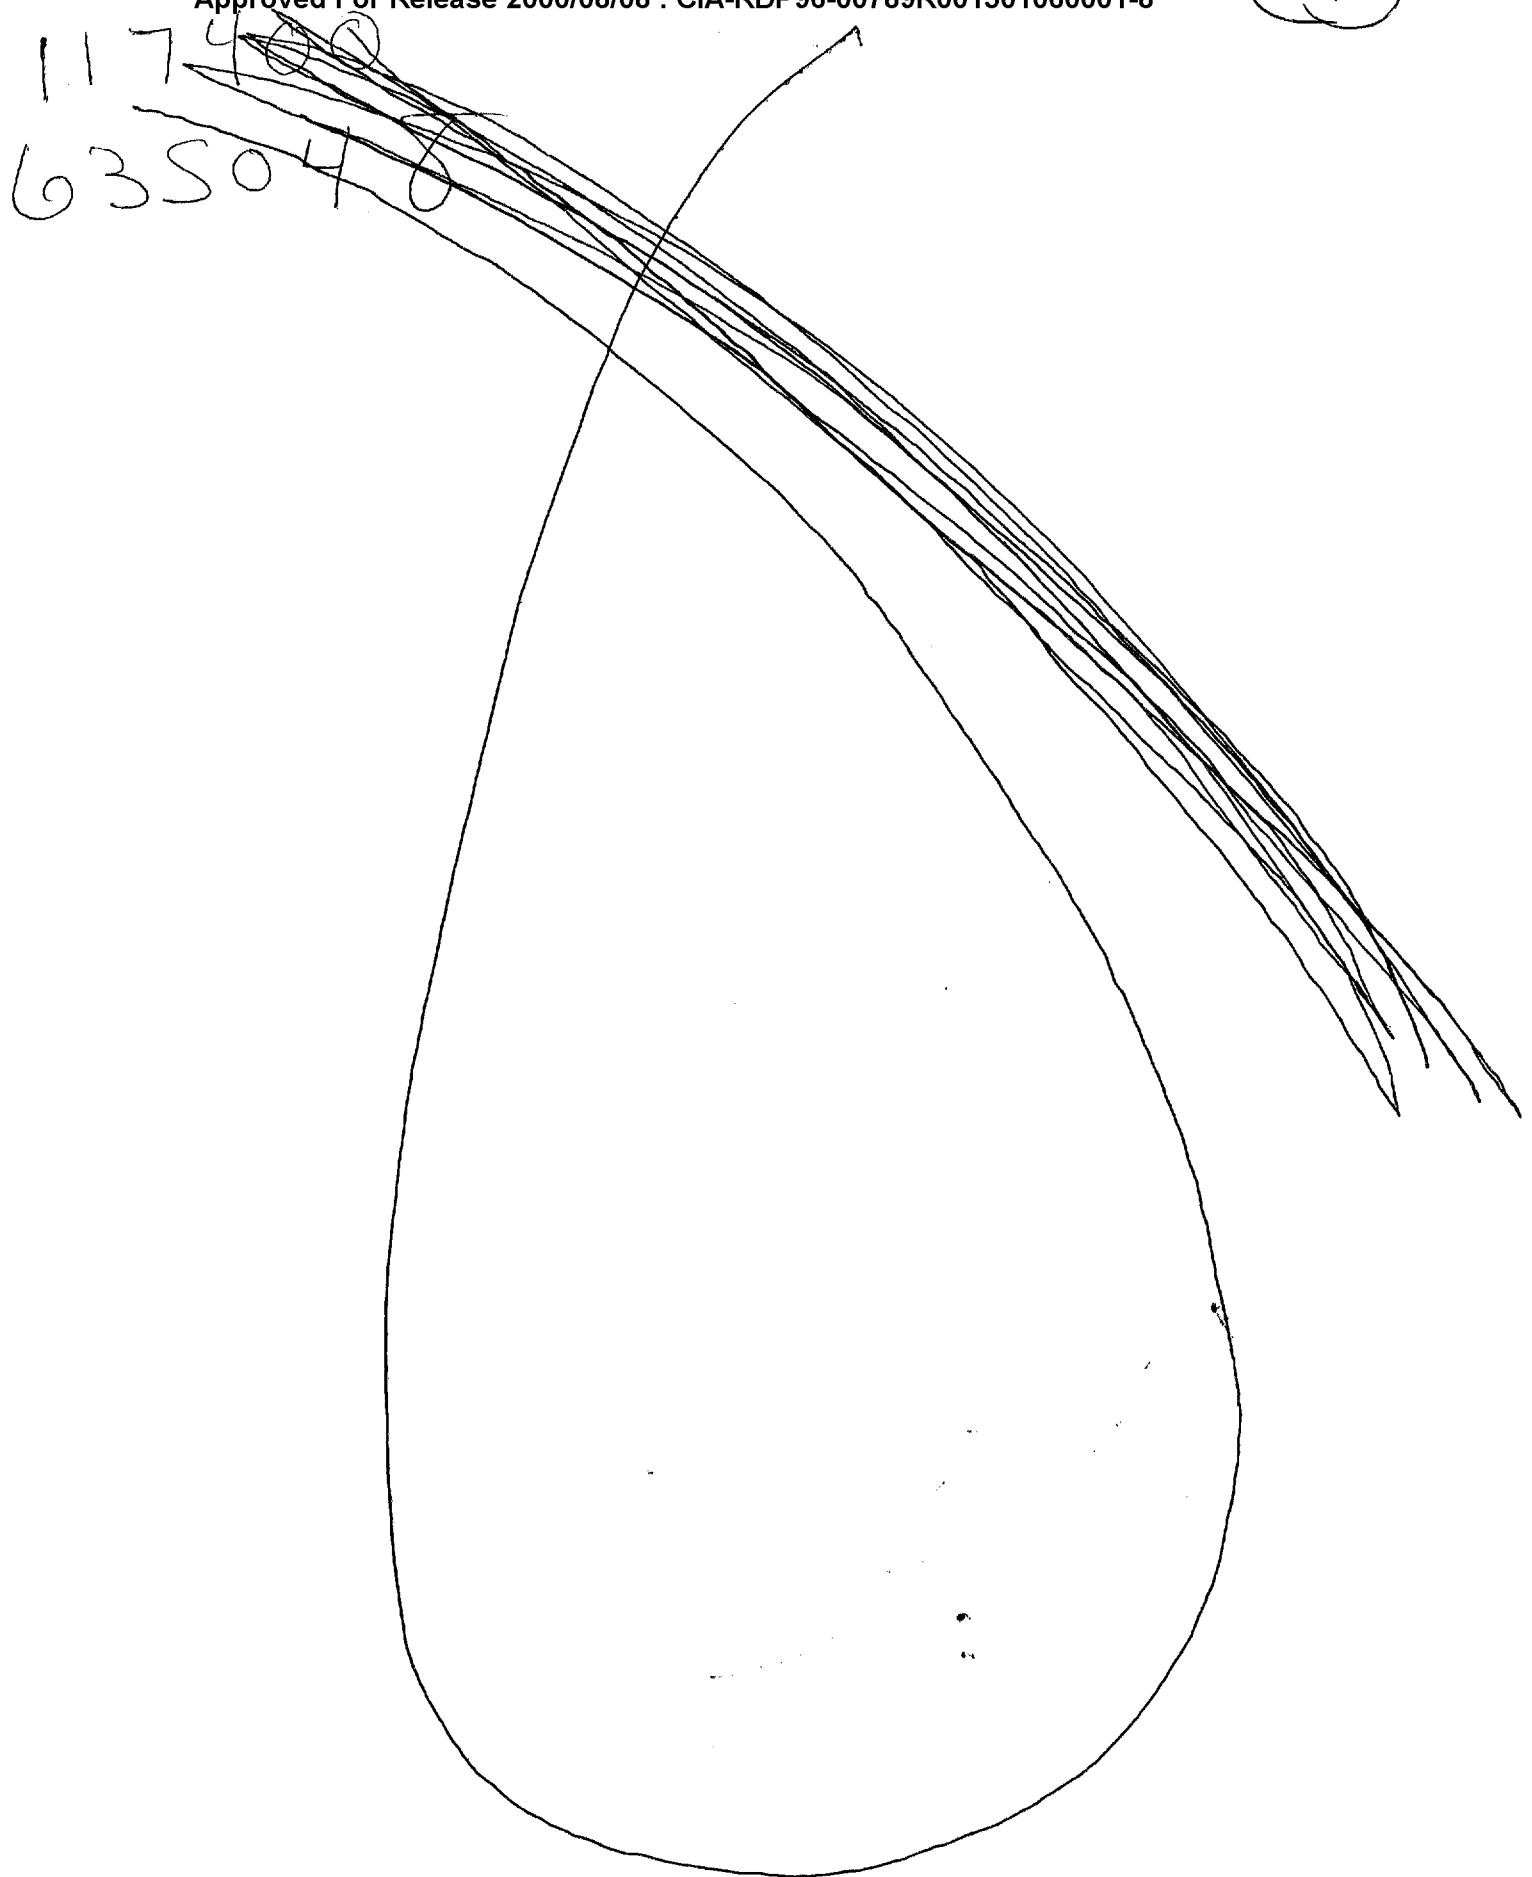

There are thickening & hollowing & natural ponds here! These ponds surprise me.

Overall, the whole gestalt is big & spacious & airy.

Parting of the site smell clean & fresh while other part smell dirty & unclear.

I'm most impressed that this is a big place & the sounds are grand.
